SUMMARY

Machine learning researcher with 8+ years of experience in autonomous vehicle systems, deep learning, and safety-critical control algorithms. Proven expertise in reinforcement learning, Bayesian neural networks, and LLM integration for intelligent systems. Skilled at applying advance scalable ML techniques in a diverse range of real-world problems. Full-stack developer with 5 years of industry experience in agile development, microservices, and responsive designs.

SKILLS AND CERTIFICATES

Machine Learning: Supervised/unsupervised learning, reinforcement learning, deep learning, statistical analysis, LLM fine-tuning, RAG, prompt engineering. **Programming:** Python (PyTorch, TensorFlow, Scikit-Learn, Keras, NumPy, Pandas), C++, SQL, React, Django, Transformers. **Data Systems:** Spark, Hadoop, ETL pipelines, large-scale data processing. **Tools & Platforms:** AWS, CI/CD pipelines, MySQL, Embedded Systems. **Certificates:** Generative AI with Large Language Models, Introduction to Gen-AI, Gen-AI with Large Language Models, Build a Backend REST API with Python & Django, Python Django - The Full Stack Guide. **Soft Skills:** Research, cross-functional collaboration, leadership.

EDUCATION

Illinois Institute of Technology	Chicago, IL
Ph.D. in Mechanical and Aerospace Engineering	(Expected) Aug 2025
University of Notre Dame	Notre Dame, IN
M.S. in Electrical Engineering	Advisor: Panos Antsaklis

EXPERIENCE

Illinois Institute of Technology	Chicago, IL
<i>Graduate Research Assistant</i>	Ongoing

- Developed a deep learning framework achieving 35% improved uncertainty quantification for autonomous vehicles.
- Built multi-agent reinforcement learning framework that improves traffic flow by 40% and reduces congestion time by 30%.

University of Notre Dame	Notre Dame, IN
<i>Graduate Research Assistant</i>	2016-2019

- Designed data driven resilient controller achieving 95% attack detection accuracy using unsupervised machine learning.
- Developed polynomial approximation framework reducing computational complexity by 50% while maintaining performance.

EmNet LLC.	South Bend, IN
<i>Machine Learning Research Intern</i>	2016

- Created deep learning architecture improving sewer water management prediction accuracy by 40% across 4 major US cities.
- Implemented neural network control mechanism in C for EPA-SWMM, deployed in production systems across multiple cities.

Tachara Online Bookstore	Tehran, Iran
<i>Technical Project Lead</i>	2010-2013

- Designed an e-commerce big data processing platform using .NET MVC 4, C# and SQL Server serving over 1M active users.
- Integrated payment gateways and inventory systems reducing transaction processing time by 60%.

Azar Negar Shargh Co.	Shiraz, Iran
<i>Principal Engineer</i>	2004-2009

- Architected and developed responsive, full-stack content management systems for high-profile corporate communications.
- Led cross-functional engineering teams implementing agile methodologies enabling same-day feature deployment.

SELECTED PROJECTS

Intelligent Traffic Management Copilot <i>LangChain, GPT-4, Vector DB</i>	Spring 2025
--	-------------

- Built LLM-powered traffic assistant processing 1000+ queries daily with 92% accuracy for traffic engineers.
- Integrated RAG pipeline with real-time data reducing incident response planning time by 45%.

RF Signal Classification Assistant <i>PyTorch, Transformers, Signal Processing</i>	Spring 2024
---	-------------

- Developed multimodal LLM combined with spectral analysis to classify and identify 95% of unknown RF signals.
- Built conversational interface to query signal characteristics using natural language, reducing analysis time by 50%.

Signal Integrity Design Copilot <i>LangChain, GPT-4, PCB Analysis Tools</i>	Spring 2024
--	-------------

- Built LLM-powered assistant for PCB signal integrity analysis, provide design recommendations with 88% accuracy.
- Integrated with Altium Designer and ADS to automate EMI and matching analysis, reducing design iteration time by 45%.

Safety-Critical Code Generator <i>CodeLlama, Prompt Engineering</i>	Winter 2023
--	-------------

- Developed code generation system for control algorithms achieving 95% safety compliance with formal verification.
- Created prompt engineering framework reducing control code development time by 70%.

LEADERSHIP AND SERVICES

- Member of search committee for Graduate Career Director position, reviewed and interviewed 6 candidates. January 2018
University of Notre Dame
- Professional Development Chair, Graduate Student Union, University of Notre Dame 2017 - 2018
- Member of University Committee on Internationalization, appointed by the President, University of Notre Dame. 2017 - 2018
- Jury and Test Designer for Iran’s National Skills Olympiad on IT Software Solutions for Business 2013
